PRODUCT DEVELOPMENT

Our success is reflected in our commitment to the continued evolution and support of our products. Our main goal is to precisely meet our users' current and future needs.

DESIGN AND DEVELOPMENT

Our design and development operation is driven by the needs of our customers and the opportunities presented by emerging technology, which ensures the highest standards are followed. CDI Premium is developed using Progress 4GL and Relational Data base environment which allows Computer Distributors, Inc.'s software specialists, working together, to use advanced structured programming techniques that incorporate the latest technological advances.

The ever changing needs of our users drive the direction of Computer Distributors, Inc.'s development team. A software development committee - backed by input from our management, consultants and customers help ensure market priorities critical to new product enhancements, and a prioritization of the workload given to our development team.

QUALITY ASSURANCE

To maintain world-class quality, all enhancements and additions are subjected to testing by Computer Distributors, Inc.'s analysts. Our customers can rest assured that the programs will carry out the job they were designed to do and perform well under the pressures of day-to-day working in Distribution or Retail operations' busy offices.

OUR GOAL IS TO BUILD LONG-TERM RELATIONSHIPS
BY MEETING THE OBJECTIVES OF OUR EXISTING AND FUTURE USER BASE.
